Nautronic Time+Temperature is a combined time of day and temperature display.

Our selection of 3 different models makes it easy to select a model for use in different areas e.g. swimming clubs, swimming baths, skiing resorts and industrial areas where temperature is important to visualize. NS is for indoor use and NW is for outdoor.

With these 3 models it is possible to show 1 to 3 temperature measurements in one single unit at the same time. This makes it very easy to compare and supervise the readings. As an option it is possible to order NT240 which makes the time-of-day radio controlled (DCF77).

Up to 9 scoreboards can be operated from one control panel. Four-sided scoreboards are also delivered on request, and in most cases custom requirements can be accommodated.

The scoreboard is easy to install, mounting brackets are supplied with every system.

Every scoreboard produced by Nautronic a/s is a high quality product and has gone through rigorous testing before leaving the factory and being shipped off to its destination anywhere in the world.
